AHQSE

Accreditation High Quality Standard Education

GLOBAL CERTIFICATION AUTHORITY

WELCOME

AHQSE is a leading and independent global authority founded to evaluate operational standards of educational organizations in order to award accreditation. It is also responsible for recognizing professional capacities thanks to transnational skills, competencies and practices derived from internationally accepted best practices.

AHQSE offers international accreditation to universities, colleges and other higher education institutions as well as tertiary institutions such as technical and vocational training providers. The institutional accreditation confirms internal quality systems besides analyzing school or university's educational curricula and overall organization. Each higher education institution is responsible for its permanent teaching and research quality improvement.

MISSION

AHQSE (Accreditation High Quality Standard Education) is a leading body for institutional credentials and accreditation in education, occupations and employment development. Credentials are granted as accreditation to institutions, schools, universities, training organizations; they are issued instead to managers, professionals, entrepreneurs, cultural operators etc. in the form of professional certification, only after AHQSE quality standards are verified.

AHQSE certifies those professional categories whose profile respond to precise professional skills. Rigorous evaluation of the candidate's CV is essential to earn an AHQSE Credential Award. Both accredited institutions and certified individuals will have their names and credentials recorded in the World Register of Accredited Institutions and Certified Professionals.

PROFESSIONAL CERTIFICATE AWARD (PCA)

AHQSE professional skills global certification will allow a better recognition of qualifications, resulting in increased professional employment. AHQSE has implemented the APEL system (Accreditation Prior Experiential Learning), a candidate CV validation aiming at evaluating and certifying globally accepted work practices, experiences, prior studies and specializations.

AHQSE grants the World Certificate Award to those who achieve CV validation and authentication through an assessment involving examination. A number of credits not less than 15/60 is compulsory. As a global body for transnational competences certification, AHQSE verifies internationally recognized best professional practices.

ELIGIBILITY

Appropriate experience grown in terms of time and demonstration of expertise in a specialized field are the main criteria to get credentials. The evaluation process involves a strict candidate's CV review, validation and authentication of his/her expertise. The accredited credential awards are WCP (World Certified Professional), WCS (World Certified Specialist) and WCM (World Certified Master).

The evaluation process also implies a profile assessment in order to determine its possible Best Practices criteria matching, whether it is Specialist, Expert or Master level.

PROFESSIONAL CERTIFICATION

As a self-regulated global certification authority, AHQSE (Accreditation Higher Quality Standard Education) grants accreditation not only to institutions and study programs but to individuals too. It awards professional recognitions as a result of candidates' Curriculum Vitae evaluations. Those professional recognitions are: WCP (World Certified Professional), WCS (World Certified Specialist) and WCM (World Certified Master).

AHQSE certification will award one among the 3 Credential Awards to suitable candidates. The basic criteria for these credential certifications are: Appropriate Experience, Professionalism, Competence, Leadership in a specific employment field ("Specialized Field").

Eligible professionals will be evaluated through the APEL system (Accreditation Prior Experiential Learning) on a PSL (Professionalism, Skills, Leadership) basis and will be assigned a certain number of PSL Credits. Candidates who have received at least 15 out of 60 credits are qualified to receive the World Certified Professional.

THE EVALUATION PROCESS FOR PCA

The Secretariat will manage the evaluation process through qualification review criteria under AHQSE elected Lead Assessors' supervision. The assessment process normally takes about 1/2 week.

The result will be a composite score based on scores addition from different assessment categories, each covering a different professional profile aspect. The assessment categories and associated scores are consistent with the AHQSE compliance standards.

Individual's Credential Certificates validity can be verified on the AHQSE home page under "CREDENTIAL VERIFICATION" by typing in the certificate number.

This is the rating scale:

0 - 15 = Fail

15 - 30 = WCP (World Certified Expert Award)

30 - 45 = WCS (World Certified Specialist Award)

45 - 60 = WCM (World Certified Master Award)

WCE - WCS - WCM - Credential Awards

POSITIVE IMPACT ON CAREER GOALS

An AHQSE Credential Award allows the recipient to rapidly connect with people sharing similar backgrounds through social media around the world. That positively impacts career goals achievement and professional profile raising interest.

An AHQSE Credential Award allows managers or professionals to shift from basic job skills to the highest level of professional recognition.

An AHQSE Credential Award is authentic. It is earned through a rigorous competences evaluation. In addition to this, any awarded person can openly check his/her Credential Award validity on the AHQSE home page under "Credential Verification" by entering the Certificate code.

REMOVE BARRIERS TO GLOBAL JOB OPPORTUNITIES

Today, job seekers face a daunting task when exploring new job opportunities, especially internationally. Proving skills and experience can be a very difficult task. Academic and professional qualifications need to be verified and authenticated, company references are required.

Professionals or managers, having AHQSE credential recognition, are globally approved for competences and experience gained over the years. AHQSE credentials recognition provides evidence of professional competence.

SHOWING COMPETENCES

Showing competences is the biggest challenge in the world of work. Frequently, job seekers' knowledge and expertise are not properly highlighted to meet the needs of businesses; that may turn into an unsuitable job.

Once the AHQSE credentials are earned, people are able to strengthen their bargaining power in the global job market thanks to a prestigious certification displaying experience and competences gained over the years. The Credential Award is evidence of professional competence for employers. Career advancement is important to many people; it means general financial benefits and, occasionally, corporate ladder climbing to the top executive positions.
